Profile

Passionate about Web Development with a demonstrated history of implementing programming knowledge and skills in the computer software industry. To solve some programming problems, I employ my skills in HTML, CSS, Javascript, React, SQL & PHP. Given any team, I try my best to be a valuable member of that team, and also, promote a team working spirit amongst colleagues to maximize productivity.

I look forward to continue learning and implementing new technologies while simultaneously boosting my relevance and productivity in any given work space.
